## Representing these quality manufacturers in Eastern Canada.

### ACE Technology

Passive RF/Microwave components:  
 duplexers, triplexers, delay filters, TTLNA's &  
 front end units.

### Aeroflex – Weinschel

Step attenuators for ATE systems, coax attenuators & terminations.  
 Custom test solutions.

### Aethercomm

Designs & manufactures medium - high power RF & microwave amplifiers for use in CW & pulsed applications from DC to 40 GHz, applications include radar, electronic warfare, communication, broadband, T/M, transmitters, receivers & RF/microwave subsystems, combat proven & durable GaN, SiC, LDMOS & GaAs technologies for the defense, satcom, industrial & wireless industries.

### American Microwave Corporation

A leader in the design & manufacture of DC to 40 GHz solid state control components, high quality microwave components & subsystems microwave solid state switches, electronically variable attenuators, detector log video amplifiers, bias tees & Integrated Assemblies.

### Anaren Microwave

Isolators & circulators: multi-layer stripline components including couplers, power dividers, integrated back planes, chip terminations, attenuators & surface-mount couplers.

### Antenova

High performance antennas & GPS antenna modules for mobile handsets, portable devices & laptop computers.

### Ducommun / DBP Microwave

Electromechanical microwave switches & relays to 40 GHz; amplifiers, antennas, control devices, ferrites, frequency converters, oscillators, passive components & subsystems.

### Emerson & Cuming

Microwave absorbers & gaskets.

### Lark Engineering

RF/microwave filters & duplexers available in leadless SMT, tubular, cavity inter-digital, combline & ceramic.

### Micro Lambda

YIG oscillators, YIG bandpass & band reject filters, frequency multipliers, phased locked sources & frequency synthesizers.

### NEE International

NEE is the world leader in the volume production of microwave printed circuit boards & assemblies, supporting the satellite LNB & cellular base station infrastructure industries as well as other high frequency applications.

### RFHIC Corporation

Active RF components & modules –GaN Wide-band Pallet Amplifiers, PLL Synthesizers, CATV Modules, Broadcasting MMICs, GaAs MMIC pHEMT, GaN HEMT Amplifiers, to support wired & wireless telecommunication & broadcasting markets. Applications include Base Stations, Repeaters, Cable Networks, LTE, WiMAX, UMTS, Digital TV, Radar, Medical. RFHIC is head quartered in Suwon, South Korea, & its US R&D office is located in Cary, NC, USA.

### Rosenberger

Coaxial connectors & adapters, precision connectors & adapters, calibration kits, test fixtures, fiber optic & automotive connectors.

### Sprague-Goodman

Variable capacitors, varactor diodes, microwave tuning elements, inductors & transformers.

### Thermacore

High performance, thermal management solutions, heat pipes, heat pipe assemblies, cold plates, liquid & two-phase cooling systems, applications in commercial, military/aerospace, avionics, radar T/R modules, power amplifiers, enclosure cooling, power semi-conductor cooling & medical device cooling.
